

NEW Moorings Voyager 1100 Flybridge Cat Arrives

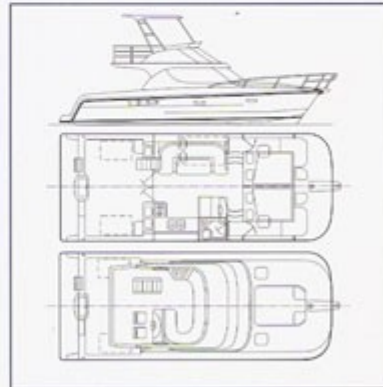

Available For Charter or Charter Ownership

The Stylish Voyager V1100 Discovery is the next generation displacement power cat design, which has been specifically developed for the cruising and charter markets. The latest low drag, semi-displacement hull provides high fuel efficiency at cruising speed.

A luxuriously appointed interior offers accommodation upto 8 people in three cabins. A bright and airy saloon incorporates a raised wrap around lounge and dinette. The well appointed galley includes a fridge, twin sinks and an oven. The large cockpit features a freezer, BBQ, sink and ample storage facilities. Moulded stairs provide easy access to a spacious flybridge which consists of twin helm seats, contoured seating for another six plus a moulded sink and storage unit. A walk through transom provides easy access to the cockpit.

Available with twin Yamnar 160hp diesel engines. The rudders and props are fully protected by the moulded keels, while the fine entry and generous tunnel clearance have produced a dry and comfortable offshore ride with outstanding seaworthiness.
